APPENDIX C-148

WEAPON SYSTEM APPLICATION ACCESS AUTHORIZATION LEVEL CODES

1. This matrix displays a portion of the weapon system security measures as expressed for the Weapon System Support Program (WSSP) policies, procedures and goals. The authorized access levels, appendix A-178, are matrixed/mapped to the various menu categories that are available for the WSDB. These codes are used as a part of and in the initiation and update of the data base user views (v_user_data) at the auth_code for the End User's application access level to indicate which tasks within the available menus that person is or will be allowed to participate. Some of the levels have partial functions available within another level's functions (i.e., between the all codes for Factors Menu, or between H and I levels for the Weapon System Maintenance Transactions Menu, or between H, I, and B for the Points of Contact menu, etc.).

2. The following tables/matrix outlines applications and codes:

WEAPON SYSTEM APPLICATION ACCESS AUTHORIZATION LEVEL CODES

Menu Categories	ACCESS LEVELS						
	H	I	B	C	M	S	U
Differentiating Factors	No Center goal changes.	No WSGC or WSDC HQ or Center goal changes. Limited weapon system access.	No WS, service, WSGC goal, or WSDC HQ goal changes.
